January 2022

Letter 1

Dear Westbank Members,

Happy New Year! We didn't accomplish all we wanted to in the last two years, but we're ready for a new year and a new start to our club activities.

Our January guest speaker, Brian Parker, will help us learn about preparing for wills and long-term care. Vice President Angie Duplessis has been contacting other speakers we had to cancel over the last two years to arrange presentations with them – even virtual presentations if needed. We need four (4) industry programs and one (1) non-industry program this year to comply with ADDC Program requirements.

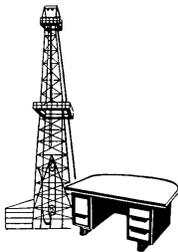

We mourn the loss of member and friend Hilda Wood. Hilda devoted 45 years to Desk and Derrick and will always be remembered.

As we start a new year, we also will have a new meeting place for the first three months. (Yes, Boomtown isn't ready for us yet!) Our meeting on January 26th will be held at the Red Maple Restaurant. Meals will be \$24 and you will have two options. Elaine will send out the meeting notice and give you the options/choices about 10 days before the meeting.

I continue to have HOPE for the coming year, despite the ongoing pandemic. But, this year, we are going to have L.O.V.E. – Lots Of Valuable Education/Experiences. May the new year bring lots of LOVE to our club and all of our members!

Trust in science and technology – stay safe!

Judi Adams

What's happening with the Westbank Club?

Secretary—Theresa Adams

We will review the November meeting minutes, which were emailed to all members at the January meeting.

Treasurer—Pam Lauckner

2021 Treasurer Debbie Brazeal will review the final budget. Pam Lauckner is working on finalizing the 2022 Budget, to be reviewed in January or February.

General Arrangements—Elaine Lesnak, Chairman

Elaine will send out the notice for our January 2022 meeting. Boomtown is still not ready for us to meet. Thanks to Becky Eymard-Leger for the contact info for the Red Maple. We will meet there for January, February, and March. Details will be shared in the meeting notice.

Membership—Susan Miller, Chairman

All members have received their renewal forms. Please review and correct if there are any changes. **Please send or drop off your form by January 19, 2022.** With renewal dues being budgeted for all current members in good standing, we'd love to have 100% renewal!

Scholarship—Bonnie Wall

BUNCO—The club has made the deposit for the hall for August 6, 2022.

Community Service—Angie Duplessis

Angie delivered the toys collected at the November meeting.

Do you have ideas for projects in 2022? The form is in the bulletin on page six (6).

Desk and Derrick Club of the Westbank

Community service opportunities - 2022

Please complete the form with information on community service opportunities for the coming year.

Member Name(s): _____

Organization Name: _____

Scope of Project:

Time Required: _____

Benefit to Community:

All projects must be reviewed/approved by the Board of Directors. **Deadline: February 16, 2022.**

The Year in Review – 2021

We started the year still under pandemic quarantine, with 33 members. This was 100% renewal, maybe in part because we budgeted for member dues of \$25 since 2020 was pretty much a loss. We held our meetings via Zoom in January, February, and March. Kenlie Fite, January speaker, inspired us to perform Random and Intentional Acts of Kindness. In February, Sandy Sanders brought us up to date on the projects to expand the Plaquemines Port Harbor & Terminal. Dr. Greg Upton updated us on the Gulf Coast Energy Outlook at the March meeting.

Things started looking up by early April, with COVID-19 numbers decreasing and things “opening up” for businesses and meeting rooms. With much happiness, our 45th Anniversary Meeting was held in person. It felt great to meet face to face; and we had 2021 Southeast Region Director Margie Steed and her assistant Dorothy Semon come down from Shreveport to celebrate with us. Plus, we welcomed new member Ellouise Arnold, Charlie Miller’s aunt. Our speaker Steven Sears’ presentation on his book Sunniland – and the importance of oil during WWII – was informative and entertaining.

At the May meeting, members voted to bestow Honorary Membership status to three of our charter members. Kori Allemand, Judy Guillot, and Sylvia Hohmann received certificates of appreciation.

Angie Duplessis lead a convention planning meeting at the end of our May meeting; almost every member’s name was on the volunteer list before we left that night.

Members continued to contribute and participate with our community service projects:

- Susan Miller, coordinating donations for St. Joseph Apartments
- Bonnie Wall, coordinating Cards for Soldiers.
- Bonnie Wall, plans for the August Bunco party in full swing,
- Angie Duplessis, working on the details for the July 10th White Elephant Brunch and the ADDC Convention scheduled for September 21-25.

In June, we watched a very interesting and informative video on the Appomattox platform and the process of building what is now a skyscraper at sea. Bunco plans were expected to change as quarantine restrictions were being lifted a bit. We were looking forward to the fundraiser!

We didn’t hold meetings in July, but we had a very successful, fun, boisterous, and delicious brunch at the Gretna Depot. Family, friends, and members enjoyed some really good food and beverages and fought (all in good nature) each other over some of the white elephant items brought to the party.

And then it all changed again...C-19 was increasing and restrictions on masking and gathering were being placed by local, state, and federal entities. The August BUNCO was rescheduled to October. We held our meeting at Boomtown, but due to technical problems, we had no program. And, then Hurricane Ida blew in on the 16th anniversary of Katrina. Damage at Boomtown resulted in cancelling the September meeting.

Between the masking and testing restrictions for Covid and the devastation caused by Ida, the ADDC Board decided to cancel this year's Convention. It was not an easy decision, but members didn't feel safe traveling (the city/parish of Orleans didn't have clear guidelines on verifying/enforcing testing and indoor gathering) and the hotel was willing to cancel without penalty. Unplanning, by the way, is much easier than planning.

October speaker was Susan Miller, who took us in her D&D Time Machine from 1949 to the future. We all enjoyed hearing about the many things that have changed in the world and in Desk and Derrick since its inception. Meeting at the Piccadilly Restaurant this month presented a couple of challenges, but we still had a nice dinner, an interesting and informative D&D program, and a productive business meeting, with 2022 Officer election (by acclamation).

Meeting again at Piccadilly Restaurant, November membership meeting was held a week earlier than our regular schedule due to Thanksgiving. Installation of Officers was a sweet presentation with a chocolate candy theme by newest honorary members Judy Guillot and Sylvia Hohmann,. It was an honor to have these members conduct the installation. Discussion was held regarding use of the ADDC funds received while the club did Convention planning and regarding changing which months we WON'T meet in 2022. Look for changes next year when the budget and meeting calendar are presented for Board and Member approval.

We held no meeting in December, but there was still work to be done. New signature cards were signed at the bank, so our 2022 Treasurer Pam Lauckner would be ready to take over from Debbie Brazeal (who's served for three years as Treasurer). The new club officer form was sent in to ADO and to RD Margie Steed and RD-Elect Kathy Martin.

The 2021 Board of Directors continued to conduct business by email as we finalized the year's activities. The 2022 Board began to communicate and get ready for the new year and the challenges and successes that lie ahead.

All things considered, things went better than expected in some things and not at all in others.

Looking forward to 2022....Judi Adams

January, 2022

To the wonderful members of the Southeast Region,

Wow! It is hard to imagine that we have arrived in 2022! 2020 and 2021 have been such whirlwinds, it feels like we just jumped right over them! Happy New Year to each of you and here's to an amazing and adventurous, live and in front of a studio audience year!!

Speaking of the new year, please make sure you have submitted your clubs ADO31 form (New Officers). The form can be found on the ADDC website, but if you have any difficulty locating the form or accessing the website, please contact me and the form will be emailed to you! Congratulations to each of you for stepping up within your club, and if you wish for a little more, please consider serving as a Region Representative for an ADDC committee. We are still in need of quite a few volunteers from the Southeast Region. Please let me know if you are interested!

It is heartbreaking to report the North Harris Montgomery County club has announced its intention to disband in January, 2022. If you are in the vicinity, please reach out to members and friends of NHMC to offer them a spot in your club! If a member wishes to transfer to another club before the renewals are complete, they can simply renew with the new club. Otherwise, if the renewal process has been done, they can request a transfer with the Member Transfer Form available on the ADDC website.

The 2022 ADDC Board, led by Philana Thompson, will be meeting for Budget and Planning in Albuquerque, NM on January 15, 2022. Your association Board will be working hard to keep our organization viable and hopefully thriving. I will report the results to you in the February letter, but if you have anything you would like discussed, please send me an email to srmdisney@gmail.com and let me be your voice.

The Lafayette Club is well underway planning for the 2022 Southeast Region Meeting to be held April 21-24, 2022 at the Doubletree Hotel in Lafayette, LA. Please mark your calendars for a wonderful reunion with good friends and a GREAT time! Come Festival with Us! More information will be provided soon.

It is sincerely my hope that I get the opportunity to visit with each of you this year. Remember, I work for YOU! If you have information you would like to share about your club, please send it to me! I know that each of you would enjoy seeing the creativity of your fellow regional clubs!! There are lots of wonderful ideas that can be shared.

Remember, "Be The Change you want to see in the world" and let's make 2022 the year of rebirth for our organization!

Kathy Martin

January 2022!

Happy New Year!

Time has been passing quickly and the last two years we've continued to live and work in a kind of social limbo, with more and more of our normally face-to-face interactions being conducted via virtual platforms.

Nowhere in our association activities has the pandemic been felt more acutely than in our in-person meetings at all levels! This in turn has made it more difficult for our clubs to attract members as well as to keep its current members engaged.

Our association is not the only one that is struggling with membership! From the changing dynamics of our association, and no doubt from your own experience, you can see that acquiring and retaining members are the big challenges for ADDC. These challenges have been growing as older members retire and potential new members don't see the value proposition that our association offers.

The four main problems are: delivering value, engaging members, reaching millennials, and adopting leading edge technology. This list can certainly be expanded, but these are the top four.

We will be having our first in-person budget and planning meeting since 2019. Membership recruitment and retainment will be our top priority. We will be tasked with finding ways to help the clubs grow and prosper! I would ask that if you personally or your club have ideas and thoughts on how the association needs to help its clubs fulfill this huge undertaking please don't hesitate to call me or email me directly.

Budget and planning will be held January 15th, 2022 in Albuquerque, NM at the Sandia Resort & Casino. This location is also where the 2023 Convention is set to be held.

Your regions are still needing volunteers to serve in committee roles! Please don't let the fear of the unknown keep you from jumping in and lending a hand!

One last note that registration deadlines are quickly approaching for membership renewals and dues, proposed changes to ADDC Bylaws and Standing Rules, and 2022 Regional Director Nominations! Be sure to reach out to your regional directors or myself for questions or concerns.

Prayers and Blessings for a Happy New Year!

Philana

The United States Department of Energy's Geothermal Technologies Office (GTO) invests in the development of hydrothermal resources to generate geothermal energy. Current funding supports:

Play Fairway Analysis

Play Fairway Analysis uses an approach borrowed from the oil and gas sector that reduces uncertainty for drilling by compiling and mapping multiple types of data to identify the most promising areas for geothermal exploration.

Microborehole Drilling

Delivering high weight-on-bit (WOB), high torque rotational horsepower to a conventional drill bit does not scale down to the hole sizes necessary to realize the potential impacts of microdrilling. Sandia National Laboratories in collaboration with Foro Energy, LLC, Atlas Copco LLC, and Geothermal Resource Group, Inc. is working to develop low WOB methods for microhole drilling, to provide impactful cost-savings for geothermal exploration.

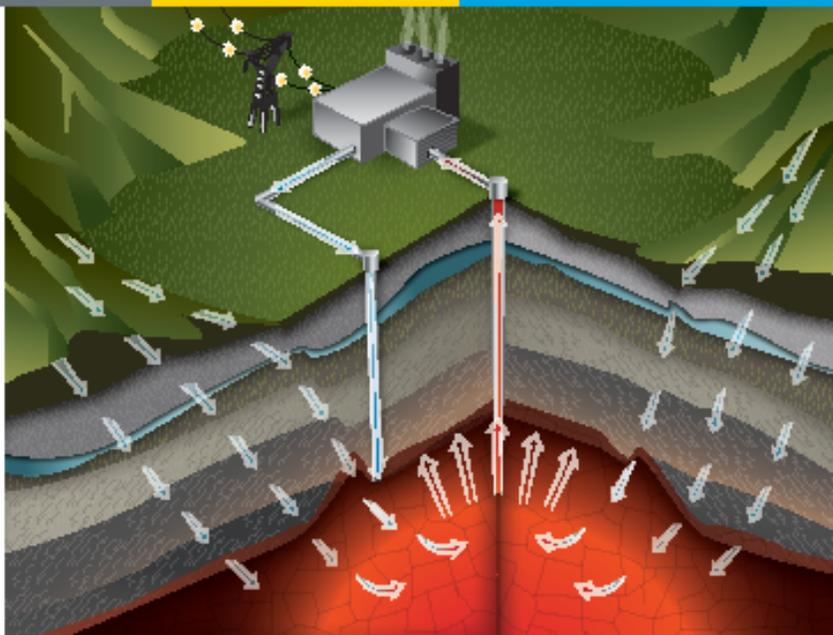

SubTER Crosscut

The US Energy Department and National Laboratories have created a crosscutting initiative focused on revolutionizing sustainable subsurface energy production and storage through improvements in the industry's ability to characterize and control subsurface fracture and fluid flow processes at increased resolution. All projects are currently in their second round of funding. In addition, DOE has recently released a FOA to continue to address subsurface research, development, and demonstration challenges.

National Lab Annual Operating Plans

The national labs carry out much of the research advancing the geothermal industry. Such research topics include: geothermometry, innovative seismic data processing, technology transfer from related industries, sedimentary geothermal feasibility, and resource reporting methodology.

Visit the Geothermal Technologies Office website at geothermal.energy.gov for more information on hydrothermal development, or contact geothermal@ee.doe.gov.

Geothermal energy, accessed through fluid in the hot rocks at a depth up to several miles, supplies a steady flow of high-pressure steam or water to create electricity.

Hydrothermal Resources

A geothermal resource requires fluid, heat, and permeability to generate electricity. Conventional hydrothermal resources contain all three components naturally. These geothermal systems can occur in widely diverse geologic settings, sometimes without clear surface manifestations of the underlying resource.

In 2008, the U.S. Geological Survey (USGS) estimated that 30 GWe of undiscovered geothermal resources exist in the western United States¹—ten times the current installed capacity. Minimizing the risks and costs of discovering and characterizing these new geothermal energy sources is therefore vital to realizing geothermal as a significant contributor to the nation's baseload energy supply.

The Process

Developing a hydrothermal system begins with fully characterizing the resource. Once the subsurface is well understood and a geothermal prospect is identified, the reservoir is then accessed by drilling. After confirming sufficient resource, size, and extent, power plant development can begin.

¹ Williams, Colin F., Reed, Marshall J., Mariner, Robert H., DeAngelo, Jacob, Galanis, S. Peter, Jr. Assessment of Moderate- and High-Temperature Geothermal Resources of the United States. (U.S. Geological Survey Fact Sheet 2008-3082) <http://pubs.usgs.gov/fs/2008/3082/>.

Foro Energy will be developing laser microdrilling technology in conjunction with Sandia National Laboratories

Exploration methods are categorized into five groups:

Geology

Characterizing geology—rock types, structures, faults, and temperatures—is a fundamental step in discovering new geothermal resources. This information comes from a diverse set of sources—field geology, maps, existing wellbores, etc.—which is then combined using cross-sections and mechanical relationships to create an accurate representation of the subsurface.

Geophysics

Potential field methods (e.g. gravity, magnetics, magnetotellurics), heat flow mapping, and advanced seismic techniques along with improvements in interpreting those data help identify and define hidden geothermal resources.

Remote Sensing

Geospatial data collected from air/space—LiDAR and InSAR, for example—are used to identify surface indicators of a geothermal resource for large or less accessible areas.

Geochemistry

Sub-soil gas, hydrocarbon, and isotope data, along with fluid samples from wells and springs, are used to identify possible up-flow areas and constrain sub-surface temperatures—a simple and cost-effective method to target resources with little or no surface expression.

Combining and Visualizing Data

Once exploration data has been collected, it is processed and incorporated into a geologic and/or reservoir model. Evaluating, weighting, updating, and visualizing data in 3D is essential to developing exploration drilling and development strategies.

Hydrothermal Resource Utilization

Step 1: Exploration

Properly characterizing the subsurface in hydrothermal settings is costly. In fact, resource confirmation relies on drilling multi-million dollar wells so that improving the chance of success has an immediate bottom line impact. The GTO invests in hydrothermal technology to: develop innovative geophysical subsurface signals to better characterize the subsurface prior to drilling; more accurately identify potential geothermal resources through Play Fairway Analysis to provide critical information and techniques that successfully target exploration areas, improve the accuracy of prospect maps, increase the ability to define resource extent; and, through exploration, result in better targeting which will lead to the advancement of a higher drilling success rate, decrease risk, and lower costs through the incorporation of more efficient oil and gas drilling techniques.

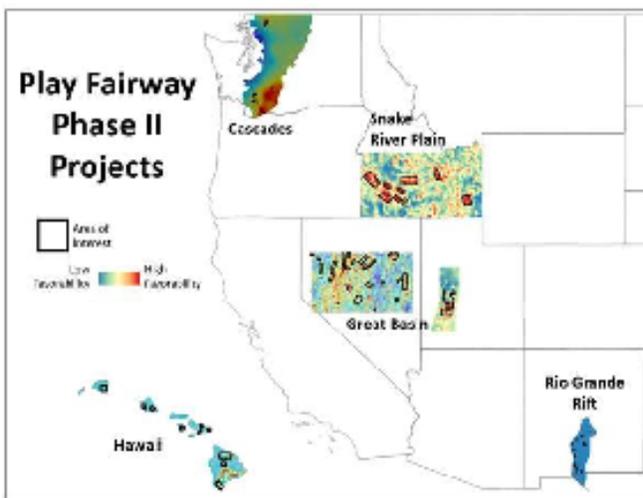

Step 2: Resource Characterization

Characterization methods utilize tools to help characterize resources. **Geology, geophysics, remote sensing, geochemistry, and combining and visualizing data** will help accelerate the discovery and utilization of undiscovered hydrothermal resources increasing exploration and confirmation well success rates.

Step 3: Resource Verification

Once a potential resource is identified through exhaustive resource characterization efforts, the focus shifts towards developing a detailed drilling plan where specific sites and methods are outlined. These plans often include the drilling of temperature gradient wells, slim and/or core holes, and, finally, production wells.

Well costs approach 50% of the total project cost for a geothermal project. These costs can also be a significant barrier to widespread deployment of geothermal power production. The Department of Energy continues to invest in advanced drilling technologies focused on increasing efficiency, decreasing drilling times, and reducing overall well costs.

After a competitive down-select following Phase I, six teams were selected to continue. Phase II activities will build upon the desktop studies of Phase I and will include new field data collection, analysis, refinement of exploration methodology, and updating of favorability maps.

Industry is Using New Technologies to Help LA Coastline Communities

Industry is utilizing partnerships to secure the latest technologies to help enhance and stabilize Louisiana's shorelines.

Over the past eight years, ConocoPhillips and Ducks Unlimited have restored or enhanced over 800 acres immediately outside of the Larose to Golden Meadow Hurricane Protection System. This work provides shoreline protection, marsh enhancement and terracing that increase the resilience of the levee system and protect the surrounding communities. This area is exposed to increasing storm surges and weather events such as the storms hitting the Louisiana coast in 2020 and 2021, as well as erosion from day-to-day tidal action.

Natrx, A Shell GameChanger company, utilized its intelligent, adaptive infrastructure platform to create and install a set of custom reef modules nicknamed "Cajun Coral." The goal of this installation was to stabilize 750 feet of a newly completed marsh creation project. With the help of Danos, 180 feet of the custom-designed Cajun Coral was installed along with 620 feet of ultralight oyster stakes.

Learn more about the world's first Cajun Coral installation and see how the oil and gas industry is incorporating innovative solutions to protect Louisiana's coastal communities:

The *OCS BBS* Website

For 24 years, we have offered comprehensive website for critical oil & gas information for the Gulf of Mexico. **Visit our website to signup for a phone demo today at www.ocsbbs.com.** Please call Charlie directly with questions at (504) 439-3164.

OWNER & OPERATOR REPORTS

Owner/Operator Report (Record Title, Operator & Operating Rights)

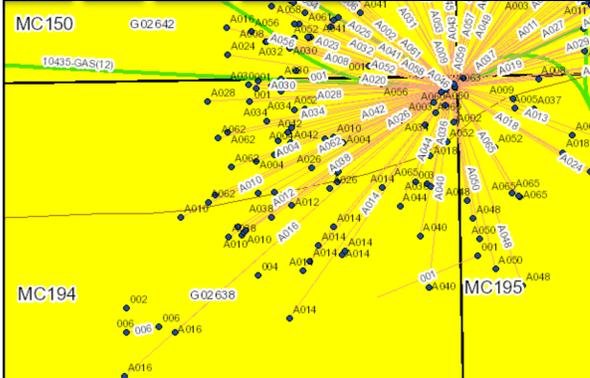

WELL, PLATFORM & PIPELINE REPORTS

1. Platform information report with details on the platform structure
2. Platform Decommission Reports
3. Track status and locations of wells
4. Daily Well Operations Report – Track current and future well operations scheduled to be performed daily for many operations like TA, PA, Initial Completions, Acidize, Casing Pressure Repair, Sidetrack/ByPass Change Zone and more.

GIS MAPPING SYSTEM

– Easily view a map of your particular block(s) activity showing owners, operators, wells, platforms, pipelines, well directionals and more.

AND MUCH MORE!

Family Hamburger Soup

Prep	Total	Ingredients	Servings
55	55	10	6
MIN	MIN		

Ingredients

- 1 lb ground beef (at least 80% lean)
- 1 cup chopped onions
- 2 cups diced peeled russet potatoes (about 1 lb)
- 1 cup sliced celery
- 1 bag (12 oz) frozen mixed vegetables
- 1 carton (32 oz) Progresso™ beef flavored broth
- 1 can (14.5 oz) Muir Glen™ organic diced tomatoes, undrained
- 1 tablespoon Worcestershire sauce
- 3/4 teaspoon salt
- 1/4 teaspoon pepper

Steps

- 1 In 4-quart saucepan or Dutch oven, cook beef and onions over medium-high heat 7 to 9 minutes, stirring frequently, until beef is thoroughly cooked; drain.
- 2 Add remaining ingredients; mix well. Heat to boiling. Reduce heat to medium-low; cover and simmer 18 to 20 minutes, stirring occasionally, until vegetables are tender.
